# RECORDS OF ANOPLURA FROM SOUTH WEST AFRICA<sup>1</sup>

K. C. EMERSON<sup>2</sup> AND K. C. KIM<sup>3</sup>

#### ABSTRACT

New and additional records on three species of *Hoplopleura* and four species of *Polyplax* are reported

Johnson (1960) reviewed existing records of Anoplura collected from African rodents and published many new species and records. Since that time, personnel of the Division of Mammals, U. S. National Museum, under the supervision of Dr. Henry W. Setzer, have made extensive collections of African mammals and their ectoparasites. This report is part of a series which reports data on Anoplura collected in the course of these studies. The collections from Southwest Africa were made by Ron E. Cole (REC) and A. C. Risser (ACR).

Since Johnson provided excellent keys, descriptions, and illustrations of all species listed in this report, no taxonomic discussion is necessary. In addition to the normal collection data, the number of specimens taken off each individual host is given as an index to abundance.

#### Hoplopleura capensis Werneck, 1954

Ex: Desmodillus arcularis (A. Smith, 1834), Namib Desert Research Station, Gobabeb, November 16, 1963,  $45\,$ °,  $42\,$ °,  $45\,$ °, nymphs, (REC-205); November 18, 1963,  $4\,$ °, (REC-217); November 18, 1963,  $1\,$ °, (ACR-318); November 18, 1963,  $15\,$ °,  $23\,$ °, 1 nymph, (ACR-321); November 19, 1963,  $7\,$ °,  $9\,$ °, (ACR-330); November 22, 1963,  $1\,$ °,  $1\,$ °, (REC-257).
