MALLOPHAGA OF IRAN : NEW RECORDS

Par A. ARDALAN (*) (***)

(*) Assistant Prof., Dept. of Environmental Health School of Public Health,
University of Teheran, Iran.

(***) Séance du 10 mars 1971.

IMPRIMERIE BARNÉOUD S. A. — LAVAL

In 1968, A. RAFYI *et al.* reported the following 13 different species of Mallophaga collected from Iran:

Goniodes dissimillis, *Goniocotes gallinae*, *Goniocotes gigas*, *Goniocotes bidentatus*, *Lipeurus caponis*, *Lipeurus heterographus* (**), *Chelopistes meleagridis*, *Columbicola columbae*, *Anaticola anseris*, *Menopon gallinae*, *Menopon tramineum*, *Menopon pallidulum*, and *Trinoton anserinum*.

Herein six new records of Mallophaga are added to above-mentioned list.

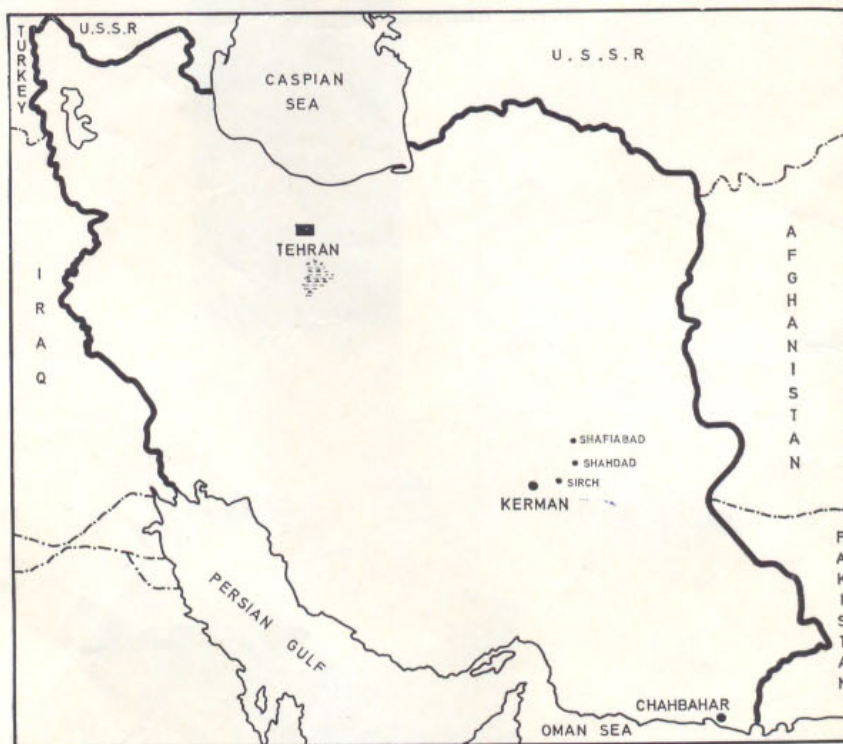

Fig. 1.

(**) Probably *Cuclogaster heterographus* (Nitsch).

- ✓ 1. *Columbicola tschulyschman* Eichler
Shafi-abad, Kerman province; 4 males, 9 females;
11 May 1968; ex *Columbia livia* Gmelin.
- ✓ 2. *Philopterus corvi* L.
Shahdad, Kerman province; 1 male, 7 females;
11 May 1968; ex *Corvus corax* L.
- ✓ 3. *Philopterus latifron* Nitsch
Sirch, Kerman province; 2 males, 5 females;
18 May 1968; ex *Cuculus canorus* L.
- ✓ 4. *Philopterus ocellatus* (Scopoli)
Shahdad, Kerman province; 9 males, 9 females;
13 May 1968; ex *Corvus corone* L.
- ✓ 5. *Cummingsiella ovalis* (Scopoli)
Chahbahar, Baluchistan province; 14 males, 17 females;
20 March 1967; ex *Numenius arquata*.
- ✓ 6. *Saemundssonina humeralis* (Denny) 19
Chahbahar, Baluchistan province; 3 males, 1 female;
20 March 1967; ex *Numenius arquata*.

The author wishes to express her thanks to Dr. A. FARHANG-AZAD for collections of Mallophaga which he kindly made during his investigations in South of Iran.
