

January 8th 1965.

My dear Richard,

Here is the Papers returned.

I have read them through and I hoped that I would <sup>have</sup> been able if you would have come to London to give you the gist of them. However I have done the next best,

adding to the English Summary what I considered of importance. Obviously I can not give you step by step their investigation procedure. You sent only 5 papers No 1, 2, 3, 5 and 6. No 4 is missing. I can not trace in these papers ref. to Hohorst's Paper of 1938 "Die Malozphagen des Hausbunnes und ihre Eiigelege". Maybe

the ref. is in Paper 4. Would you did not  
send. I hope that <sup>what</sup> I have done will be  
of some help to you. I enquired about  
Translations of the Papers but they seem  
too technical for ordinary translators.

I was interested in the perusal of the  
papers and I can quite imagine that  
the research work can become very  
fascinating.

Trust you are all well. Ettie and  
I have been having a bit of "Arthritics"  
no wonder with this weather.

Ettie joins me in sending you all  
our fondest love,

Yours, Daddy.
