

Park 4710.

18, Kensington Park Gardens,
London, W.11.

January 18. 1957.

Dear Dr. Werneck,

Very many thanks for your papers and the interesting collection of Mallophaga which arrived safely. I send off today all the mammal Mallophaga we have in the collection. Colonel Meinertzhagen is going to India next week and will collect material for you where possible. I always go through the birds and mammals which die in the Zoological Gardens and will send you any mammal Mallophaga I get. In future the specimens will be sent unmounted in alcohol. We should be very pleased to have any bird Mallophaga you get, especially off any of the Tinamus sp. and from Progne subis. If you will kindly send the bird skins addresses to:-

Colonel Meinertzhagen
17 Kensington Park Gardens,
London W.11

as he has a permit to allow in bird skins from abroad.

Again thanking you very much for the Mallophaga you have sent.

yours truly

T. J. ...
