

# Lice From Foreign Mammals in Danish Collections.

By  
J. Maltbæk.

---

The present material of foreign Anoplures I have received for identification from the Zoologisk Museum, Copenhagen, (marked Z. M. in the list) and from Veterinær- og Landbohøjskolen, Copenhagen, (marked L.) and I wish to express my sincerest thanks to the leaders of the two institutions, Dr. phil. Kai L. Henriksen and Prof. Dr. Math. Thomsen, respectively. The two collections contained several species of interest, and I therefore want to give a list of the material. Finds from Denmark, the Faroes, Iceland, and Greenland are not included in this list, but must be sought in the publications of the fauna of Anoplures of the respective countries which have appeared or will appear.

## *Siphunculata.*

*Antarctophthirus trichechi* Boheman.

From the skin of a walrus, *Trichechus rosmarus*, Bering Strait (Z. M.).
