

# Extended Data Fig. 1: Summary of cophylogenetic reconstruction of optimal MPRs from eMPress comparison (cost scheme duplication: 1, sorting: 1, and host-switching: 2) of the louse (concatenated) tree with the mammal host tree.

From: [Phylogenomics reveals the origin of mammal lice out of Afrotheria](#)

Arrows indicate direction of host-switches. Numbers associated with events are the percentage of MPRs with that event.
